File Design Systems is a professional software services company.
We provide software development and support services to manufacturing,
financial, and retail based industries throughout North America.

PROGRAMMING AND SOFTWARE DEVELOPMENT

- Lot Trace applications (SQL Server 2000 and Visual Basic 6.0).
- Sequencing applications (SQL Server 2000, Stored Procedures, Access, Visual Basic 6.0).
- Inventory Control applications (SQL Server).
- Verification Systems.
- Logistic and Supply Chain applications.
- Scrap Reporting applications that record scrap codes and quantities into ERP Systems.
- Crystal Reports for shipping, receiving, and production processes.
- Generate Advance Shipment Notices (ASN's).
- 1x3, 2x4, and 4x6 AIAG bar codes for Intermec 3400/E4, Sato, and Zebra bar code printers.
- Visual Basic, Microsoft Access, and MySQL applications.
- Web based applications (PHP, ASP, Flash, Cascading Style Sheets, Java Script, Java, HTML).
- Contract Programming Assignments.

MULTIPLE PLATFORM SUPPORT AND FLEXIBILITY

- Internet/Web hosting, DNS, FTP, Secure Shell access, and e-mail accounts.
- Interface to ERP, Trans4m, MRP, SAP, PLC, EDI, AS400, CMS, and RF systems.
- Rockwell RS/Lynx software for PLC communications.
- Cross platform testing and data migration using ODBC drivers.
- Import, process, and manipulate 866 and broadcast data.
- Simply Accounting and EFT Direct support.
- Royal Bank Payment Manager using Smart Cards support.

SUPPORT

- 24/7 remote support using PC/Anywhere, network monitoring support, and telephone support.
- Install, configure, test, and troubleshoot network interface cards, routers, and modems.
- On-site and remote system administration services for Linux, Unix, and Windows 2000/XP.
- Install, maintain, and upgrade software packages and operating systems.
- Develop and rollout software, user documentation, and training.
